MIMPI

Not just another Private Label Programme

Our aim is to support retailers worldwide with a private label programme that empowers and enables them to remain relevant and stand out in an increasingly crowded marketplace. Our ambition is not to produce products that are "as good as", but to meet and exceed the product and design quality as well as the value to quality ratio available through other channels.

Our support does not end with the physical product, but extends to sales and marketing support. We have a large library of location and studio photography as well as line drawings available at no cost and can, for a small fee, produce custom catalogues, tear sheets, marketing videos etc.

In simple terms, our mission is to enable any retailer to have a private label offering where the branding, packing and marketing materials are of a high quality and can be customised to the retailer's needs.

Founded by a 6th generation furniture maker, we pride ourselves on the craftsman heritage of our company. A heritage that comes with a pledge to strive for immaculate craftsmanship and sustainability in every product we produce. For us, true sustainability covers the complete product lifecycle from a timeless design that will stand the test of time, to the use of wood from sustainable sources, to quality craftsmanship.

DESIGNERS

Povl Eskildsen

A product of the classic Danish furniture tradition, Povl's interest in design in general and furniture design in particular, started at a young age on the shop floor of his parent's furniture factory in Salling, Denmark. Povl studied architecture at the renowned Aarhus School of Architecture. He initially worked with a number of Danish indoor furniture companies before turning his sights on outdoor

furniture. Working with among others, Trip-Trap and Gloster, Povl brought a new sense of design into the outdoor furniture industry, in particular in teak furniture, where his designs brought the elegance & comfort that had been the norm in Danish indoor furniture for decades to a category where heft and weight rather than design and comfort had been key selling parameters.

Dick Björk

Dick's interest in furniture design was ignited at an early age where he spent a considerable amount of time in his parent's iconic furniture shop in Helsingborg, Sweden. Starting in his teenage years, Dick funded his passion for design by working after school and weekends assembling furniture, a task that laid the foundation for his passion for perfecting even the smallest of details. Dick went on to study metal work and trained as a cabinetmaker. Having worked as a craftsman at some of Sweden's leading furniture producers, Dick turned to furniture design. His early work include pioneering mixed material outdoor furniture for legendary Berga Form of Sweden.

A graduate from the prestigious Royal Danish Academy, Susanne has since the early nineties designed a plethora of successful products that include furniture, fabrics, kitchenware, lamps and safety products.

Susanne's designs are rooted in the Scandinavian tradition of simplicity and elegance with a strong focus on both aesthetics and functionality. Sustainability is an important consideration in her design process. Many of Susanne's projects have earned her internationally renowned design awards including the

Design Award, the Norwegian Design Prize and the German Design Award.

After completing an apprenticeship, Kris went on to manage AJ Iversen's prestigious furniture workshop in Copenhagen. In his pursuit for professional perfection, Kris joined the Danish Technological Institute, where he helped establish the Danish

> Furnituremakers Quality Control body, which he headed for several years.

> In the late 1960s, Kris partnered with entrepreneur Paul Wallevik to set up Scanstyle-Mim in Ghana, the first high-end furniture manufacturing company in a developing country.

Kris built, set up, and led furniture businesses across the globe. Kris' lifelong passion for furniture, resulted in a vast catalogue of innovative designs.

ZANZIBAR

Inspired by Kaare Klint's Faaborg Chair, Dick Björk's Zanzibar presents a contemporary take on the classic framed chair with a woven surface. The rounded rectangular shape was chosen to ensure that each piece, including the dining chair, is designed primarily for use with cushions, combining timeless elegance with modern comfort.

Zanzibar incorporates our jute mesh. Despite its natural look and feel, jute mesh is made from durable UV stabilised polyethylene, a material which is recyclable and has been used in the outdoor furniture industry for decades.

Inspired by the simple and clean lines of Johan Von Spreckelsen's La Grande Arche in Paris, the Cube collection, available in both teak and aluminium versions, includes sculptural pieces of furniture that are available in a wide range of colours. The aluminium-framed versions are not only eye-catching, but also light, practical and durable. The sledge base allows for the chairs to be used on soft surfaces. The construction of chairs and dining tables are reinforced with stainless steel components that provide the strength and durability required for many years of daily use. On Cube Alu, the integration of teak on the arms enhances comfort at this important contact point. The highlight of the collection includes the swivel rocking lounge chair, the folding director's chair, as well as unique fire tables which combine teak with a ceramic top and a 50,000 BTU (14.7 kWh) burner.

The Maya sling chairs feature a sturdy stainless steel reinforced teak frame that allows for a comfortable sit without the use of cushions. Aside from sling fabrics, the Maya chair is also available with seating surfaces in teak, man-made wicker, or rope. All Maya dining chairs are stackable.

The Maya lounge collection features a fabric-covered backrest that gives the collection an aesthetic that is reminiscent of indoor furniture.

Inspired by Børge Mogensen's iconic J39 Chair. Povl Eskildsen's re-think of a classic Danish dining chair retains the charm of its predecessors but adds a new level of simplicity and practicality. Two chairs can be stacked for storage and transport, whilst circumventing the aesthetic compromises of a stacking chair. The Vera modular lounge stays true to the roots of its origins by retaining an organic look and feel with the practicality of a modular lounge.

CARLA ALU

Experience the epitome of luxurious living with our Carla Alu collection, meticulously designed with Mediterranean and US scales in mind.

Crafted with the simplicity of aluminium, Carla Alu has an almost natural and tactile feel, enhanced by the addition of teak arms and our newly developed range of six different marine-grade flat ropes. The dining and coffee tables are available with a teak top or one of seven different ceramic tops. The dining chairs can be customized with either a teak or aluminium seat.

With a vast array of cushion fabrics and frame finishes to choose from, the Carla Alu collection offers a near-endless degree of customisation.

STELLA

Seamlessly combining extruded aluminium with teak and rope, Povl Eskildsen's Stella is a contemporary design that has his signature understated design language and comfort at heart.

The Stella dining chair is light, yet it stacks and provides a surprisingly comfortable sit, not only when seated straight on the chair, but also when seated at odd angles such as when conversing with a person to one's side.

Experience Stella Lounge, designed for both style and comfort. Whether you prefer a modular or conventional setup, you will appreciate the elegant aesthetic and the exceptional support from its carefully chosen multi-density foam. Further customise the Stella Lounge by selecting from a range of rope colours, available in either a sleek flat or classic round profile.

1962 newspaper article on the international launch of the Christian Chair

The Kris chair was originally designed by Christian Nørgaard in 1951 as a gift to his aunt. The chair, produced at the Nørgaard workshop in the village of Skodborg, Denmark, was introduced to an international audience as the "Christian Chair" during the February 1962 furniture fair in Cologne, Germany. During 2022, we collaborated closely with Kris to convert his original design to a construction that is engineered for outdoor use, but now in production with the next generation of Nørgaard furniture makers.

The sculptural qualities of the design with its organic component shapes, yet cubical geometry, is a testimony to Mies van der Rohe's philosophy that "less is more".

Kris Alu

For season 2026, we are thrilled to introduce Kris Alu, a stunning evolution of Kris's original design, now reimagined as a collection of elegant aluminium dining chairs.

Aluminium can sometimes feel too cold in cooler environments or too hot in warmer ones. To address this, we have woven the backrest with Danish cord, providing a comfortable seating experience year-round. The arms of the chairs retain the natural beauty and pleasant touch of teak, adding a touch of warmth and sophistication.

Like all our aluminium products, Kris Alu is crafted with sustainability in mind, using 70% recycled materials.

ADIRONDACK

Experience a modern reimagining of an American classic with our Adirondack collection. This refined update features hidden stainless steel hardware and enhanced ergonomics, elevating the comfort of this iconic century-old design to rival that of contemporary chairs.

The Adirondack Club Chair, a reimagined version of the classic. This redesigned classic maintains the comfortable seating position of our classic Adirondack chair, but raised to a height that makes it easier to get in and out of, blending timeless style with modern comfort and convenience.

OPTI

Thanks to the use of powder-coated stainless steel, Dick Björk's Opti collection is a perfect blend of lightweight appearance and durability. Opti offers a softer, more refreshing take on a category typically dominated by masculine designs. The dining, deck and club chairs feature a loom-style wicker with enough flex to provide comfort without the need for cushions.

Opti Lounge, crafted with a young audience in mind, is a versatile lounge collection. It can be used as conventional lounge seating with lumbar support cushions or, with the lumbar cushions removed, as a modern lounge deep enough to sit with your legs up on the seat. The Opti modular design seamlessly combines style and adaptability, catering to a variety of seating preferences.

ELEANOR

Named in honour of the late American political figure Eleanor Roosevelt, a champion of the UN's Declaration of Human Rights, the Eleanor collection is our first collaboration with renowned and award-winning designer Susanne Grønlund. Eleanor showcases Susanne's focus on elegant designs, which in terms of both styling and engineering are designed to stand the test of time.

Susanne's experience with a wide range of materials and product categories and her ability to think outside the box is evident in every detail. Her focus on minimising environmental impact has resulted in every item in the collection either shipping partly disassembled or in the case of the Eleanor dining chairs, stacked multiple units in a single carton. This reduces both environmental impact and shipping cost.

Optional cushion for Ella Alu Sling Dining Chairs

Our range of universal tables and loungers/chaises offers versatility in a minimalistic design. The Elements dining tables feature teak tops with stunningly wide 200mm (8") slats and frames available in either teak or powder-coated aluminium. The Elements Extending tables boast a generous 123cm (42.3") extension using the reliable Dutch-style pull-out system, a technique first pioneered in the 1500s.

For a more affordable option, the Elements Alu tables feature an all-aluminium top that mimics the elegant 200mm (8") wide slats of the teak versions. These tables provide a sleek and modern look without compromising on quality.

EMPOWERING WOMEN THROUGH HANDICRAFT

Our factory has always been close to the communities it operates in, and we know that there are many unemployed women in our community, many of whom have been left to support their families on their own. We cannot offer all of them permanent employment, but wanted to find a craft that could earn the women money from home between their daily chores. Hand crocheting was an obvious choice: it is fairly easy to teach and requires virtually no capital investment. Crocheted products are well-sought after locally, and Indonesia has a strong culture of producing beautiful handcrafted products.

Aside from making outdoor cushions for us, the women also crochet intricate purses and bags that are sold on the local markets. We've also shown them how to market and sell their products online via Tokopedia.com, the largest online trading site in Indonesia. Our ladies say it best themselves:

"There are thousands of stories behind our smiles – stories of how we struggle to survive, looking after our families, often as the only income-earner. We are strong, but in our lives, hope is more beautiful than reality. We often do double duty as mother and father, the backbone of the household, with everything revolving around our children; educating them, feeding them, loving them. Jobs in our community are scarce, and what jobs are available would take us away from our children, leaving them at home unattended and with nobody to help them with their homework. The factory in our area has given us new hope; empowering us and guiding us on earning an income, while working from home and being parents to our children. As you'll see, we make high quality products because we are observant, thorough, sincere, proud and happy in every pull of the yarn we make. It never even crossed our minds that we could make a product that could be shipped across the seas – we hope you feel the warmth in every piece we make. By buying one of our products, you help us in our struggle to give our children a better life. A bunch of love from us, Strong Single Mothers."

Hand crocheting is a time-consuming endeavour: a 50x50cm scatter cushion takes roughly 18 hours. On average, the crochet cushions can supplement a woman's income by US\$ 80/month, in a community where the monthly income is typically around U\$ 160.

The crochet covers are produced on a not-for-profit basis. We source an outdoor grade yarn, supply it for free to the women and pay them a fee for their work. For the products the women market themselves, we have negotiated favourable rates with a local yarn producer so the women can obtain raw materials at a much lower cost, than if they were to purchase the yarns from other sources.

LUNA

Our collection of soft goods is designed to elevate your outdoor living experience. It features universal cushions for loungers, chaises, chairs and benches, as well as stylish scatter cushions for lounge seating. Complementing these, our Luna rugs add a touch of softness and warmth to any outdoor space. Heft ensures the Luna rugs lay flat, while the polypropylene fabric's wicking properties guarantees quick drying.

Crafted from the same durable, mildew-resistant and UV-resistant fabrics used in our sling chairs, Luna beach bags are as rugged as they are elegant, perfect for withstanding even the most demanding outdoor adventures.

BAYA UMBRELLAS

A craftsman's take on the classic teak umbrella. Designed with custom-made hardware, Baya umbrellas offer a level of refinement rarely seen in teak umbrellas. Built for maximum strength and serviceability, the umbrellas feature solid teak laminated poles, cross-laminated hubs, and a canopy made from commercial-grade acrylic fabric. User-replaceable teak arms are secured to the vented canopy with reinforced pockets. On the large umbrellas, a 4-pulley system ensures effortless operation. The rope is held in place with a yacht-style rope clamp, and excess rope is neatly stored with a genuine leather strap.

In 2024, we introduced the world's first crank-operated teak cantilever umbrella. Building on this innovation, we are thrilled to expand our range of Baya Teak Cantilever Umbrellas for the 2026 season, introducing a stunning 3.5 meter (11.5 ft) square cantilever umbrella. Our crank-operated cantilever umbrellas are designed with reinforced, user-replaceable spokes and a versatile base that allows the umbrella mast to be mounted either offset or centered, offering unparalleled flexibility and style.

Discover the perfect blend of innovation and functionality with our stainless steel reinforced Baya Telescopic Teak Umbrella. Featuring a crank-operated mechanism, these umbrellas folds gracefully over a dining table.

New for 2026: Baya Umbrellas with Tilt and Macramé Canopy. We are excited to introduce two new additions to our Baya Umbrella collection for season 2026:

Baya Umbrellas with tilt: Our new tilting umbrellas feature a custom in-house produced push-button tilt mechanism reinforced with stainless steel, ensuring strength and durability. Enjoy an adjustable shade built with durability in mind.

Baya Umbrellas with Macramé Canopy: Add a touch of bohemian elegance to any outdoor space with our new Baya Teak Macramé Umbrellas. These beautifully crafted umbrellas combine the timeless appeal of macramé with the robust functionality of our Baya Teak Umbrellas.

BAYA UMBRELLA BASES

The umbrella bases for our Baya market umbrellas constructed with a phosphated powder-coated steel base plate, ensuring both durability and style. Each base is equipped with nylon glides and holes for secure anchoring to the ground. The umbrella pole is held within a powder-coated stainless steel tube, featuring solid aluminium knobs for easy adjustment. An integrated shoehorn-shaped stainless steel insert ensures the umbrella is held firmly in place without damaging the pole. For added stability, the weight of the bases can be doubled by adding a double-stack steel plate. For enhanced mobility, a set of lockable heavy-duty castors can be fitted to any base.

MATERIALS

Teak

Teak's dense nature, high content of silica and oils makes it hard wearing and naturally resistant to rot and impervious to insects. Teak is one of only a few tropical hardwoods that can be successfully grown in plantations.

Our teak wood is sourced exclusively from certified government-owned plantations in Indonesia. The plantations are the single largest source of employment in Indonesia. Teak is grown like any other crop, where harvesting and re-planting is done in unison to ensure the plantations, which were first established in the late 1800's, will remain a renewable source of income for future generations.

Each teak log is carefully selected with the aim that all the wood used must originate from slow-grown mature trees. In the conversion into furniture components, virtually nothing is wasted. Shavings and sawdust are either recycled into agricultural products or converted into incense sticks for use at places of worship, while offcuts serve as bio-fuel that is burnt to generate energy.

The uniform colour of our teak wood is achieved through careful selection, not manipulation with chemicals such as oils, bleaches and stains. This ensures that when left untreated, the wood will over time develop a natural silver grey patina.

This picture above shows a cross section of a mature teak log. The white coloured wood around the periphery is sapwood. Sapwood is the juvenile part of the tree trunk used for transporting moisture from the roots to the foliage. The golden-yellow part is heartwood. Heartwood is the part of the tree that gives the tree trunk the structural strength required to withstand the outdoor elements. Teak heart wood is resistant to rot and insects, while teak sapwood is not. In low grade teak furniture, stains, oils, and varnishes are applied to the sapwood or the complete furniture to mask the use of sapwood. Furniture constructed with sapwood will regardless of the chemicals applied eventually rot prematurely. Teak produced by Quality Works does not include sapwood and is free from stains, oils and varnish. What you see and feel is 100% natural teak heartwood.

Stainless Steel

We use industry standard AISI304 grade stainless steel. Tubular sections are formed from sheets that have been pickled and passivated to ensure the metal is free of contaminants that may otherwise result in corrosion. Each frame is welded by hand, and each weld individually pickled. The completed frames are satin finished by hand to ensure a consistent and smooth finish.

When exposed to atmospheric air, stainless steel forms a natural passive layer that protects the base metal from corrosion. In corrosive environment such as the salt-laden air near coastal settings, airborne contaminants can disturb the protective passive layer. This will manifest itself as a light brown tarnishing, often referred to as "tea staining". This tarnishing has no impact on the performance of the metal and can be minimised by cleaning the furniture regularly with a mild soapy solution, preferably applied with a light abrasive such as 3M Scotchbrite®. We recommend the use of powder coated stainless for coastal settings where a minimum of cleaning is of importance.

Aluminium

The raw material required for aluminium is one of the most abundant minerals on earth. Aluminium's low weight to strength ratio makes it ideal for outdoor furniture. We use a multitude of alloys and a combination of die cast and extruded components.

The frames are welded by hand using essentially the same technique used for airplanes and rugged downhill mountain bikes. The finished frames are pre-treated, then powder coated. The pre-treatment ensures excellent coating adhesion and eliminates the risk of large scale coating failure that would otherwise be the result of moisture reaching the base metal through scratches in the coating that will occur in everyday use.

Aluminium furniture produced by Quality Works contains 70% recycled aluminium.

Powder Coating

Our powder coatings are durable, outdoor grade polyester-based finishes that are electrostatically applied to the substrate. Aluminium substrates are chemically pre-treated, while stainless substrates are mechanically and chemically pre-treated.

Ceramic

Its ability to withstand the elements and its unique hardwearing and scratch-resistant nature makes ceramic an excellent choice for an attractive, yet low-maintenance table top.

High-Pressure Laminate

A great alternative to ceramic, aluminium and teak tops, our high pressure laminate is UV resistant. This ensures maximum durability. Unsupported HPL will warp over time. Therefore, all our HPL tops are supported by a rigid metal frame.

HPL Anthracite

Sling Fabrics

We source our cushion and sling fabrics from reputable suppliers around the globe. In addition to our stock Sattler/Outdura®, Agora®, Sunbrella®, Phifertex® and Sunproof® fabrics, customers can specify specific fabrics for use on their orders.

Cushion Fabrics

We offer two constructions in outdoor cushions. Both are engineered in a manner that keeps rainwater from soaking into the cushion fill.

- Back coated fabrics (grade C and D), which are inherently waterproof to over 6000mm/236" of water column.
- Cushions made from uncoated fabrics (grade A and B) are equipped with an inner cover made from a certified PFAS/PFOS free breathable water barrier fabric that is water-proof to 400mm/16" of water column.

Deep Chestnut Acrylic with Back Coating

Wicker

All our wickers are man-made, colourfast, UV resistant and recyclable. We use two types of man-made wicker: extruded high-density polyethylene (PE) and braided polypropylene (PP) rope. The wicking properties of polypropylene ensures that the rope, despite its fabric feel, will dry quickly after a downpour.

Regardless of the wicker used, its application onto any given frame is done by skilled craftsmen.

Hand Crocheted Covers

Our crochet covers are made from UV stabilised polypropylene yarns. The yarns are resistant to most solvents and have good colour fastness. The yarns have been tested to 3,000 hours of UV exposure and carry a 3 year warranty. The crochet covers are recyclable and ROHS compliant.

Rugs

Made from strands of braided UV resistant polypropylene, that are carefully stitched together, our rugs have been tested to 3,000 hours of UV exposure and carry a 3 year warranty.

Turquoise

Care and Maintenance

Outdoor furniture exposed to the elements will endure the heat and humidity of summer, as well as the dryness and freezing temperatures of winter. Aside from the change in temperature, seasonal extremes also involve the furniture being exposed to the UV radiation of the sun, rain and snow. Therefore, the requirements for outdoor furniture are significantly greater than that of indoor furniture. Nevertheless, high-end outdoor furniture requires only a bare minimum in terms of maintenance. Depending on the environment the furniture is used in, we recommend that the furniture be cleaned with warm soapy water once or twice annually.

Teak

Special teak care products may speed up the cleaning process, but are not required. We recommend that you allow your teak furniture to weather naturally. Your furniture will gradually develop a soft silver-grey patina. It is only the surface of the teak wood that changes colour. Once you clean your furniture with soapy water, or a dedicated teak cleaning product, the furniture will return to a golden-brown colour. Applying soapy water with a scouring brush or an abrasive pad such as 3M Scotchbrite® will speed up the cleaning process. Occasional cleaning will ensure your furniture develops an even silver-grey patina without dark spots.

After many years of exposure to the elements, the surface of your furniture may become rough. Should you wish to smoothen the rough surfaces, you can do so using a fine grit sandpaper. If you choose to only sand parts of the furniture, the sanded area will gradually develop a silver-grey patina again and blend in with the rest of the furniture.

For teak furniture exposed to the elements, we do not recommend the use of teak oil (linseed oil), paint or varnish. Teak oil, paint and varnish will break down in an uneven manner and may peel off in chunks, increasing the level of maintenance required, as the application of new teak oil, paint or varnish will require that the old layers be sanded off first.

Powder Coated Furniture

Our powder coatings are durable, outdoor grade polyester-based finishes that are electrostatically applied. Aluminium substrates are chemically pre-treated, while stainless steel substrates are mechanically and chemically pre-treated. Our aluminium frames are made from 70% recycled aluminium. Umbrella base plates, which are made from steel, are phosphated prior to being powder coated. The phosphating process increases corrosion resistance and paint adhesion.

Like any painted surface, large scratches and chips should be repaired as soon as possible. On umbrella bases, repair of scratches and chips is important to prevent rust. Any rust should be sanded off with fine grit sandpaper and the affected area thoroughly cleaned with isopropyl alcohol prior to the application of any paint. Before applying touch-up paint, test it on a non-visible location to ensure the colour is a close match.

Powder coated surfaces can be cleaned with soapy water applied with a non-abrasive sponge such as those used for cars. Non-oily soap such as dish washing soaps (Dawn®, Fairy®, Sunlight®, etc) are ideal. Rinse thoroughly with lukewarm water and allow the furniture to air dry. It is important that any soap residue is rinsed off, as soap residue will attract dirt.

Ceramics & HPL

We use quality HPL and ceramic surfaces on a wide range of our products, primarily table tops. Both HPL and ceramic surfaces are easy to maintain, but similar to any furniture used outdoors, HPL and ceramic surfaces should be cleaned regularly. When required, clean with soapy water and a non-abrasive sponge. For tough stains and lime deposits, use a dedicated house-hold grade ceramic cleaner such as those designed for cleaning bathroom tiles.

Ropes

All our ropes are ROHS compliant marine grade ropes made from UV stabilised solution dyed polypropylene (PP). The PP yarns are braided together to form the visible textile surface. At its core, each rope is reinforced with either polypropylene yarns or solid extruded polyethylene.

As needed, clean the furniture with soapy water applied with a soft brush. Non-oily soap such as dish washing soaps (Dawn®, Fairy®, Sunlight®, etc) are ideal. Rinse thoroughly with lukewarm water. It is important that any soap residue is rinsed off, as soap residue will attract dirt. The wicking properties of polypropylene ensures that the rope, despite its fabric feel, will air dry quickly.

HDPE Wicker, and Danish Cord

Our HDPE wickers as well as Danish cords are man-made wicker materials produced from UV stabilised High Density Polyethylene (HDPE). Both materials require a minimum of maintenance. As needed, clean the furniture with soapy water applied with a soft brush or a non-abrasive sponge. Non-oily soap such as dish washing soaps (Dawn®, Fairy®, Sunlight®, etc) are ideal. Rinse thoroughly with lukewarm water and allow the furniture to air dry. It is important that any soap residue is rinsed off, as soap residue will attract dirt.

Sling Fabrics

As needed, clean the surface of the fabrics with soapy water applied with a soft brush. Non-oily soap such as dish washing soaps (Dawn®, Fairy®, Sunlight®, etc) are ideal. For tough stains use a solution with 20% household bleach and water. Rinse thoroughly with lukewarm water and allow the fabric to air dry.

Cushions and Poufs

The care instructions for cushion covers are sewn on the inside seam that attaches the zipper to the cushion fabric. Note that the care instructions for different fabrics may not be the same. For tough stains that cannot be washed out with soapy water, use a solution with 20% household bleach and water. Always rinse thoroughly to ensure there is no soap or bleach residue in the fabric.

For poufs, the care instructions for the covers are located on the inside of the opening in the cover. For tough stains that cannot be washed out with soapy water, use a solution with 20% household bleach and water. Always rinse thoroughly to ensure there is no soap or bleach residue on the fabric.

ABOUT QUALITY WORKS

For OEM enquires: E-mail: info@q-works.net Phone: +62 31 99200901

3-minutes production tour of Quality Works

In an industry that is accustomed to large corporations and private equity funds, Quality Works is a nimble, quality and cost-conscious family-owned business with a manufacturing base in Java, Indonesia. The company can trace its origins through 6 generations of Danish furnituremakers. The company's core business is design, development and manufacturing of furniture, cushions and related accessories made from a wide range of materials. The company has a workforce of over 400 people.

Quality Works is FSC®, SVLK/FLEGT® and Amfori BSCI certified.

Member of amfori, the leading global business association for open and sustainable trade. For more information visit www.amfori.org
